

**W2/W3 Professur „Experimental Planetology“, Bayerisches Geoinstitut,
Vortragsprogramm 31.01.-01.02.2017**

Dienstag, 31. Januar 2017

- 14:30 Vortrag **Dr. Kate Kiseeva** (University of Oxford)
"Sulphides - Geochemical messengers from the mantle"
- 15:15 Vortrag **Dr. Christoph Burkhardt** (Universität Münster)
"Earthly consequences of heavenly anomalies - Meteorites and the composition of the Earth"

Mittwoch, 01. Februar 2017

- 09:00 Vortrag **PD Dr. Raúl Fonseca** (Universität Bonn)
"The genetics of the Earth and Moon - insights from the partitioning behaviour of Mo and W during lunar mantle melting"
- 09:45 Vortrag **Prof. Audrey Bouvier** (University of Western Ontario)
"Isotopes as tracers of planetary formation and differentiation processes"
- 14:00 Vortrag **Prof. David Dobson** (University College London)
"Greater than the sum of the parts: Grain boundaries in the mantle"
- 14:45 Vortrag **Dr. Hauke Marquardt** (Bayerisches Geoinstitut)
"Experimental exploration of planetary interiors"
